

PRODUCT SPECIFICATION GUIDE

Low Maintenance and Barefoot Friendly

- EZ Dock polyethylene docks are durable and slip resistant
- Won't splinter or rot, never needs painting
- Cleans easily with soap and water

Adaptable Design

- Unique design delivers outstanding load capacity, functionality, and safety
- Variety of dock sections, boat/PWC lifts, and launches for kayaks
- Easily customizable design to make your perfect waterfront retreat

Flexible Flotation Technology

- Flotation chambers constructed for optimal strength and structural integrity. Concave pylon creates suction between the recess and the water
- Designed to provide additional stability on the water
- Dock sections adapt easily to changing water conditions and levels

Innovative Coupling

- The Dog Bone, made of recycled materials
- Nuts and bolts made of heavy duty, rust resistant composite
- Strength and durability even in the harshest weather conditions

American Made

- Proudly for 30 years

DOCK SECTIONS

EZ Dock’s polyethylene dock sections offer unmatched performance when it comes to modular docking solutions. Our revolutionary design is durable, slip-resistant, and low maintenance to help ensure an enjoyable time on the water. Each dock and port section includes a decking surface and float structure in a single, integrated unit. Our proprietary flotation chamber and pylon design provides enhanced buoyancy and stability to reduce movement even in rough water and stormy conditions. Constructed with extra-heavy and extra-thick walls for optimal strength. No frame or expensive decking required.

- **100% virgin linear low-density polyethylene (LLDPE)**
 - **UV Ray resistant**
 - **Slip-resistant pattern**
- **Unique pylon (chamber) design grabs the water like an upside down cup**
 - **Rotationally molded, to allow no seams or connection points**
- **62.5 lbs. (28.3) per square foot, including dead load (standard)**
 - **Standard - 14 5/8" (0.37m) tall**
 - **Low Profile- 7 5/8" (0.19m) tall**

PERSONAL WATER CRAFT PORTS

EZ Ports feature a raised bow stop that helps prevent overshooting the port, with no winching, cranking, pumping, or hoisting needed. All EZ Ports can be linked together and easily adapted to other floating and fixed docks using our revolutionary Dog Bone coupler system with EZ Dock connectors. The same proprietary flotation chamber and pylon design provides enhanced buoyancy and stability. EZ Port also provides plenty of space on the front and either side of the port to allow PWC users to find their footing comfortably. EZ Port PWC lifts move with changing water levels, protecting personal watercraft from waves, wind, and the damage they can cause. Our personal watercraft ports are also covered by an industry-leading 8-year warranty. Low maintenance and barefoot friendly, EZ Dock’s polyethylene ports are durable and slip resistant. They won’t splinter or rot, and never need painting. They are easy to clean with a pressure washer or EPA-approved cleaning solutions.

EZ PORT MAX INLINE

The modular, adjustable, and expandable EZ Port MAX PWC port system is built to accommodate multiple PWCs of different shapes. The EZ Port MAX is one of the most flexible options available and can be customized to maximize slip spaces with tandem inlines that help you accommodate more PWCs per slip. Configure the design that best suits your waterfront and adjust it whenever your needs change.

EZ LAUNCH® RESIDENTIAL

- Dock entry enables stable, dry entry.
- Launch-assist paddle notches support easy entry/exit. V-shaped entry centers vessel for a confident, consistent launch. (patented US 10,793,237 B2)
- Engineered to connect with virtually any dock (EZ Dock or any other dock).
- Fits canoes, tandem kayaks, stand-up paddleboards, etc.

EZ BOATPORT®

The EZ BoatPort is a simple and stable drive-on, drive-off method of docking for boats in a wide range of sizes up to 5,000 lbs.

- Configurations to fit multiple boat shapes and sizes
 - Works with existing floating or fixed docks
 - Can be used in as little as 2ft of water without float tanks
 - No winching, cranking, or hoisting
 - Two skid bunk options to fit a variety of hull shapes and sizes
- Up to three additional keel rollers for longer boats
 - Optional supplemental flotation kit for added buoyancy
 - Optional side extensions for additional walk-around room

AEGIS7 BOAT LIFT

EZ Dock’s newest entry in the boat lift category is the Aegis™ 7 Boat Lift. This boat lift promotes fast and convenient access to your boat and keeps it looking like new. EZ Dock offers a complete system including new air-assist pumps in both 110 volt (standard) and solar models (optional). Each boat lift is available with manual control (standard) placed near the lift or with remote control (optional). The Aegis boat lift tank system is precision-molded with linear low-density polyethylene (LLDPE), resistant to the worst weather conditions, and low water damage. The lift keeps the boat out of the water and free from marine growth on outdrives and the hull of your boat. The frame is constructed from hot-dipped, galvanized steel and corrosion-resistant hardware. The lift also allows you to have easy access to your watercraft to eliminate difficult maintenance challenges. The lift is compatible with EZ Dock products and traditional dock systems. Through the use of our air assist pumps, the new boat lift is capable of hoisting boats up to 7,000 lbs. in weight and 28 feet in length. The Aegis 7 Boat Lift features fully adjustable standard bunk locations for V hull boats, with the ability to customize as needed for a variety of hull configurations. The lift also features premium low-friction and high strength, ultra-high molecular weight (UHMW), polyethylene bearing surfaces.

POLY POST HANDRAILS

ALUMINUM RAILING

EZ Dock is pleased to announce the availability of our new G500 series gangways hinge kits and dock to shore transition ramps. All G500 gangway frames are made of lightweight aluminum materials that are carefully welded in the USA by skilled welders. G500 gangways weigh 25% less (approx.) than G400 series gangways. ADA compliant railings can be assembled at the job site (Mounting hardware is provided.)

Available in popular 36" (0.9m) and 48" (1.2m) widths and lengths ranging from 10' (3m) to 30' (9.1m) in 5' increments, the new gangways come with the buyer's choice of factory installed beige or grey ThruFlow decking to create a consistent look with other EZ Dock products.

ThruFlow panels are durable and maintenance free allowing you to spend more time enjoying your deck or dock, than working on it. They also feature a heat-resistant, non-slip surface for safety and comfort. This decking is covered by ThruFlow's Lifetime Limited Warranty. ThruFlow panels are revolutionary in their ability to allow light to pass through protecting the delicate aquatic life below. They also allow wind and water to safely pass through them, helping to prevent damage that may be incurred by high waves and wind.

Slip resistant aluminum decking with heat sink bottoms to draw heat away from the decking surface is also available as a decking option.

All decking panels are installed at the factory to provide a clean, flush appearance. All new decking must be installed to meet local, state, and federal building codes or other regulations that apply to these products at the installer's discretion and responsibility.
