

PARKS AND REC

CUSTOMIZABLE DOCK SOLUTIONS TO FIT RECREATIONAL NEEDS

We know that parks and recreation docks are not one-size-fits all solutions. Our versatile modular design allows for endless configurations to suit your specific needs.

Flexibility and strength allow each piece of an EZ Dock to move independently, even in rough waters or bad weather.

Our unique coupling design lets you create a commercial dock to fit your specific needs. Easy to install and customizable, your EZ Dock can evolve over time as your needs change, with easily configurable products.

EZ Dock provides Parks and Recreational facilities with a cost-effective, durable, and versatile solution for enhancing waterfront access and amenities, ultimately enriching the outdoor experience for visitors of all ages and abilities.

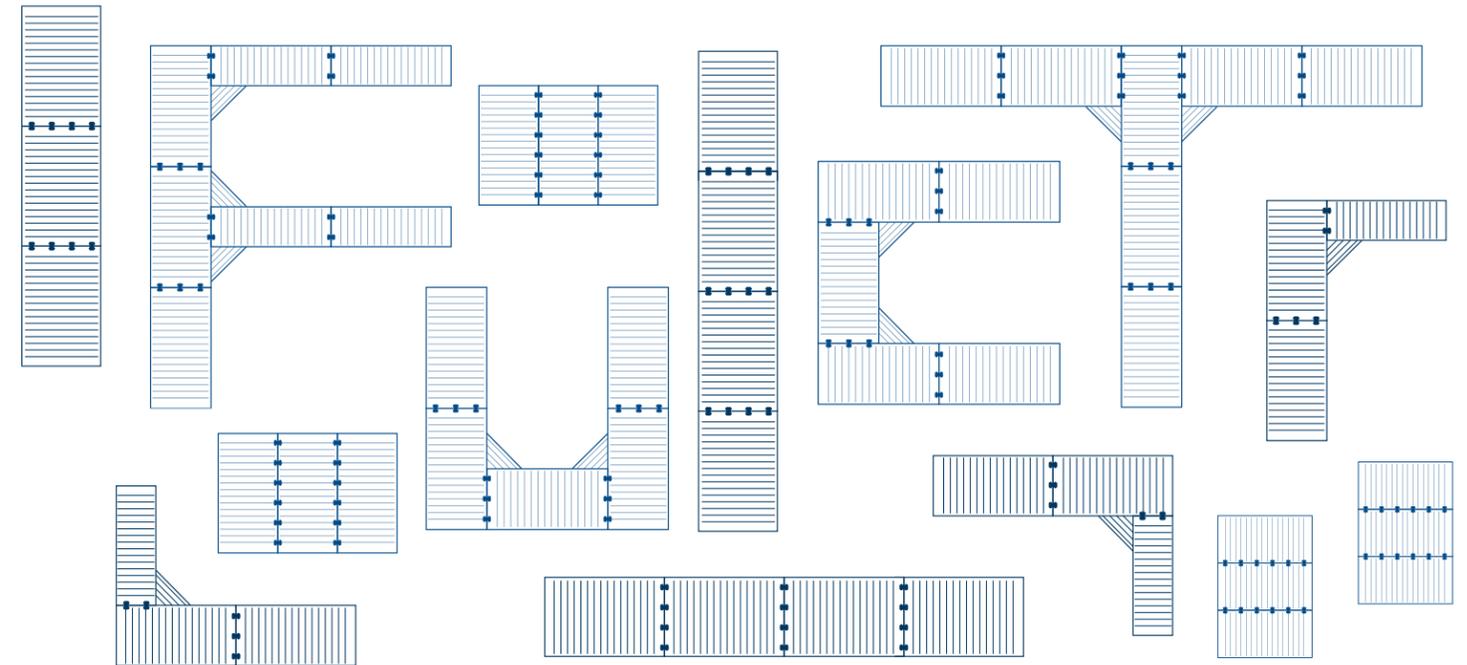

City of Greenville Municipal Park
Greenville, NC

- Single dock sections made of linear low-density polyethylene (LLDPE)
- UV Ray resistant
- Slip resistant pattern
- Unique pylon (chamber) design provides strength and stability
- Rotationally molded to allow no seams
- 62.5 lbs. per square foot of flotation, including dead load
- Standard dock - 14 5/8" (37.14cm) tall
- Low Profile dock - 7 5/8" (19.36cm) tall

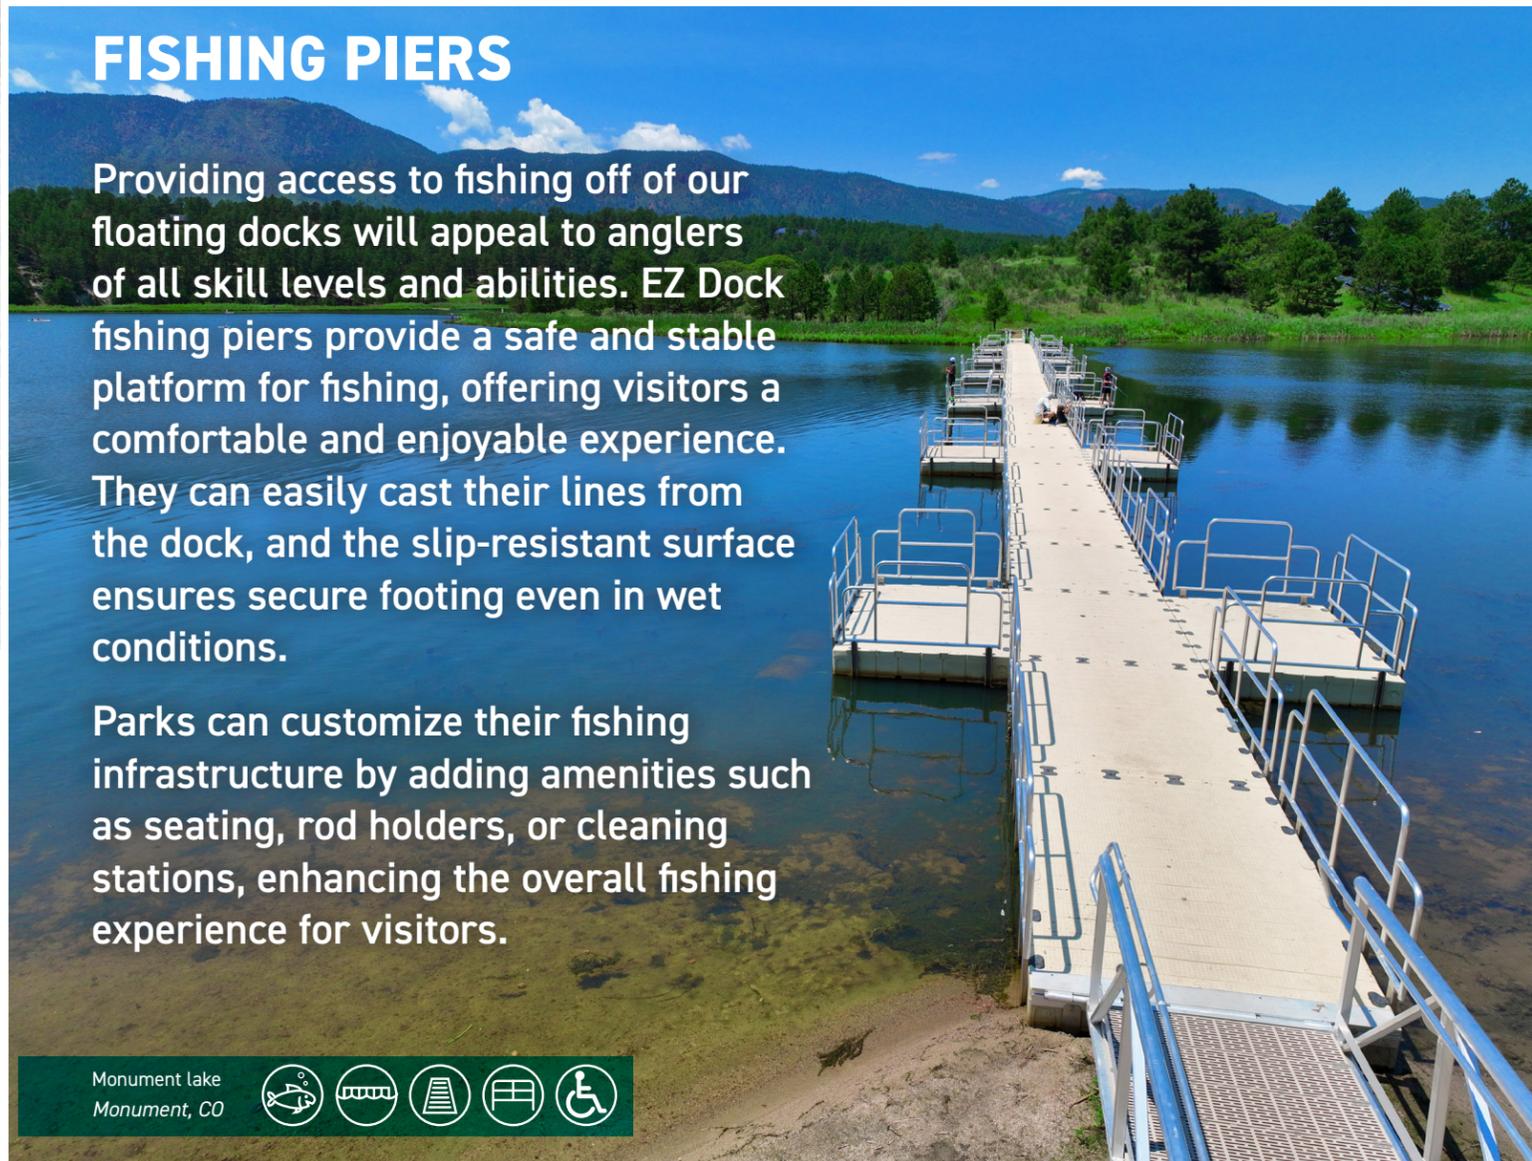

ENDLESS CONFIGURATIONS

FISHING PIERS

Providing access to fishing off of our floating docks will appeal to anglers of all skill levels and abilities. EZ Dock fishing piers provide a safe and stable platform for fishing, offering visitors a comfortable and enjoyable experience. They can easily cast their lines from the dock, and the slip-resistant surface ensures secure footing even in wet conditions.

Parks can customize their fishing infrastructure by adding amenities such as seating, rod holders, or cleaning stations, enhancing the overall fishing experience for visitors.

EZ TRAIL WALKWAYS

Parks often contain wetlands as part of their natural ecosystems, and preserving these areas is a priority for conservation efforts.

The EZ Trail floating walkway system works in harmony with the environment and can help keep protected wetlands unharmed.

- Environmentally friendly materials that do not leach harmful chemicals into the water or disrupt sensitive ecosystems.
- Patented floating design allows it to adapt to fluctuating water levels without causing damage to the wetland habitat.
- Non-penetrating auger or weight systems anchoring leaves wetland soils and vegetation undisturbed.
- Modular design, allows park managers to adjust the layout of the dock system.

Connecting guests with remote parts of nature can be a challenge. In fall of 2021, EZ Dock partnered with the Pukaskwa National Park in Ontario, Canada to rebuild a wetland hiking trail that had deteriorated and was wreaking havoc on the local ecosystem in addition to becoming a safety hazard for park guests.

Pukaskwa National Park
Ontario, Canada

PUKASKWA NATIONAL PARK ONTARIO, CANADA

The build location within the Pukaskwa National Park offered numerous challenges for the EZ Dock Team. Treacherous terrain required all equipment and product be hiked the 1 mile (1.5 km) in or flown in by helicopter. A fragile ecosystem required the team to only use hand or battery-operated tools, as petroleum-based tools were not allowed within the wetland. Additional challenges included being mindful of the requirements and sanctity of working on historically sacred land and timing constraints due to the park being open to guests and wildlife in the area.

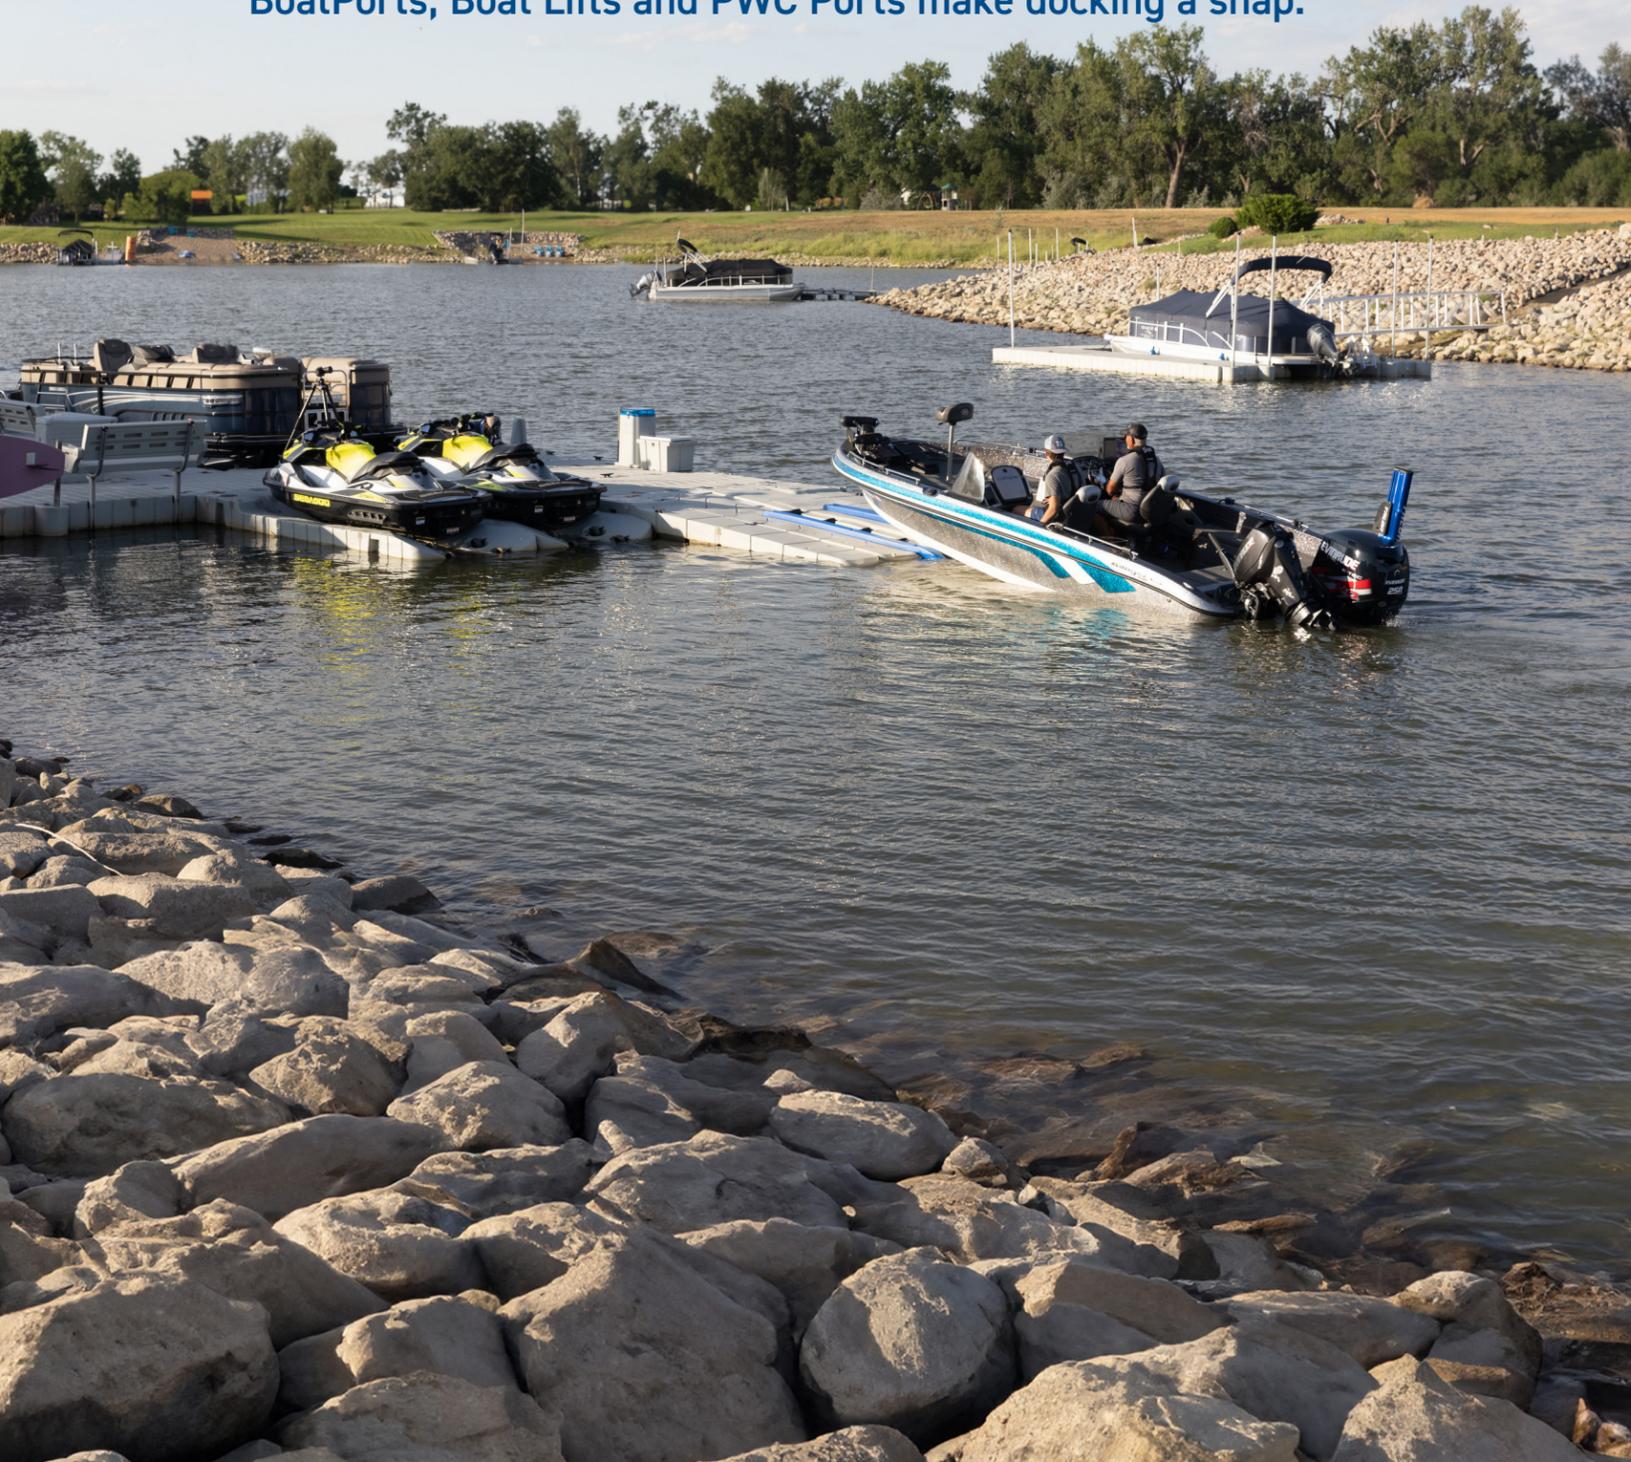

EZ Dock's EZ Trail Floating Dock Walkway was the perfect solution for this large, unique project. Made of Virgin Polymer, Thermoplastic, Rotational Molding Grade Low Liner Density Polyethylene (LLDPE), the EZ Trail provided an environmentally friendly, less invasive walkway. An EZ Trail option was also much easier to install than a traditional dock system and required little maintenance even in extreme temperatures, which occur regularly during in Ontario's winter months.

With the help of three, local indigenous people, their knowledge of the land, hard work ethic, and comedic relief, the EZ Dock team was able to complete a project unlike one anyone had ever worked on before within the scheduled timeline. To cap off the project, a local elder came and blessed the trail before it was opened to the public.

Many parks with access to lakes, rivers, or coastal areas offer opportunities for boating and personal watercraft activities. Parks must prioritize safety and provide adequate infrastructure to support boating and watercraft activities.

EZ Dock serves as a valuable resource for parks seeking to provide safe, accessible, and environmentally sustainable boating and personal watercraft experiences for visitors. No matter what kinds of boats or personal watercraft will be docking on your waterway, EZ Dock's BoatPorts, Boat Lifts and PWC Ports make docking a snap.

KAYAKS AND CANOES

Travis Mills Foundation Lake Lodge
Rome, MN

With a growing interest in kayaking as a recreational activity, there is increased demand for parks to provide accessible solutions for kayakers of all abilities.

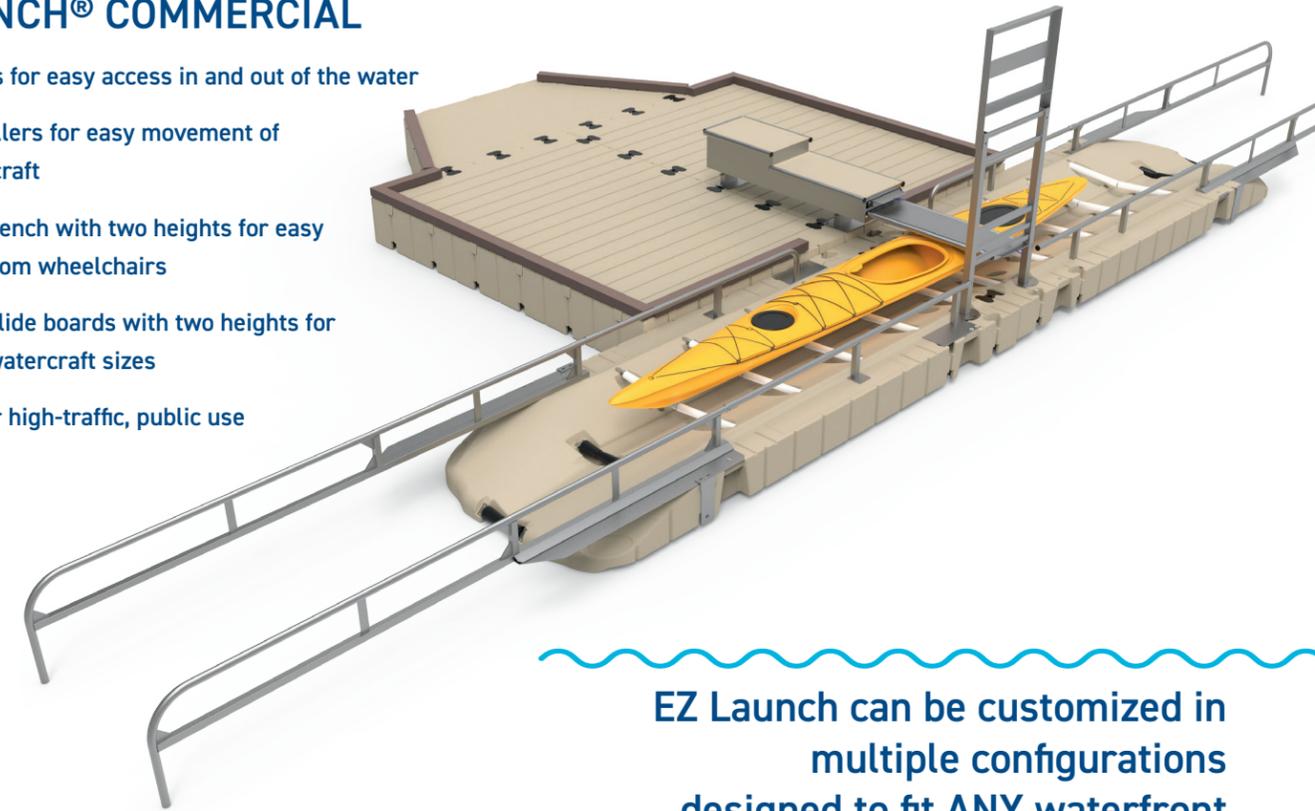

The innovative, new one-piece design of the Residential EZ Kayak Launch allows the dock and launch to rise and fall with changing water levels, making it easier for everyone to access the water and the dock.

Parks are also subject to accessibility standards and regulations, such as the Americans with Disabilities Act (ADA). This legislation requires that parks and recreational facilities provide equal access to people with disabilities, including those who participate in kayaking and other water activities.

A first in the industry, the EZ Launch Accessible Transfer System for kayaks and canoes, provides individuals with disabilities accessibility that exceeds the minimum requirements of the ADA. The customizable system includes transfer benches, transfer platforms, and guide rails that help individuals safely enter and exit kayaks from the dock.

EZ LAUNCH® COMMERCIAL

- Guide rails for easy access in and out of the water
- Launch rollers for easy movement of the watercraft
- Transfer bench with two heights for easy transfer from wheelchairs
- Transfer slide boards with two heights for differing watercraft sizes
- Perfect for high-traffic, public use

EZ Launch can be customized in multiple configurations designed to fit ANY waterfront

RESIDENTIAL EZ KAYAK LAUNCH

- Allows users a stable and dry entry into the water
- Launch-assist paddle notches for support in kayak entry & exit
- Ability to connect to virtually any dock
- Great for canoes and stand up paddle boards too!

WHY EZ DOCK IS THE BEST INVESTMENT YOU WILL EVER MAKE

EZ Dock products are the perfect solution for all abilities and experience levels. It's designed to help anyone transfer into a watercraft independently and securely and enjoy a stable launch regardless of waves caused by tides, wind or boat wakes.

With its modular design, EZ Launch is easy to install and integrates seamlessly into existing EZ Dock systems or traditional dock designs.

Maintenance-Free & Barefoot Friendly

- EZ Dock's polyethylene docks are durable and slip resistant
- Won't splinter or rot, never needs to be painted
- Cleans easily with soap and water

Adaptable Design

- Unique design delivers outstanding load capacity, functionality, and safety
- Variety of dock sections, boat/PWC lifts, and kayak launches
- Easily customizable design to make your perfect waterfront retreat

Flexible Flotation Technology

- Flotation chambers are constructed for optimal strength and structural integrity
- Designed to provide additional stability on the water
- Dock sections adapt easily to changing water conditions and levels

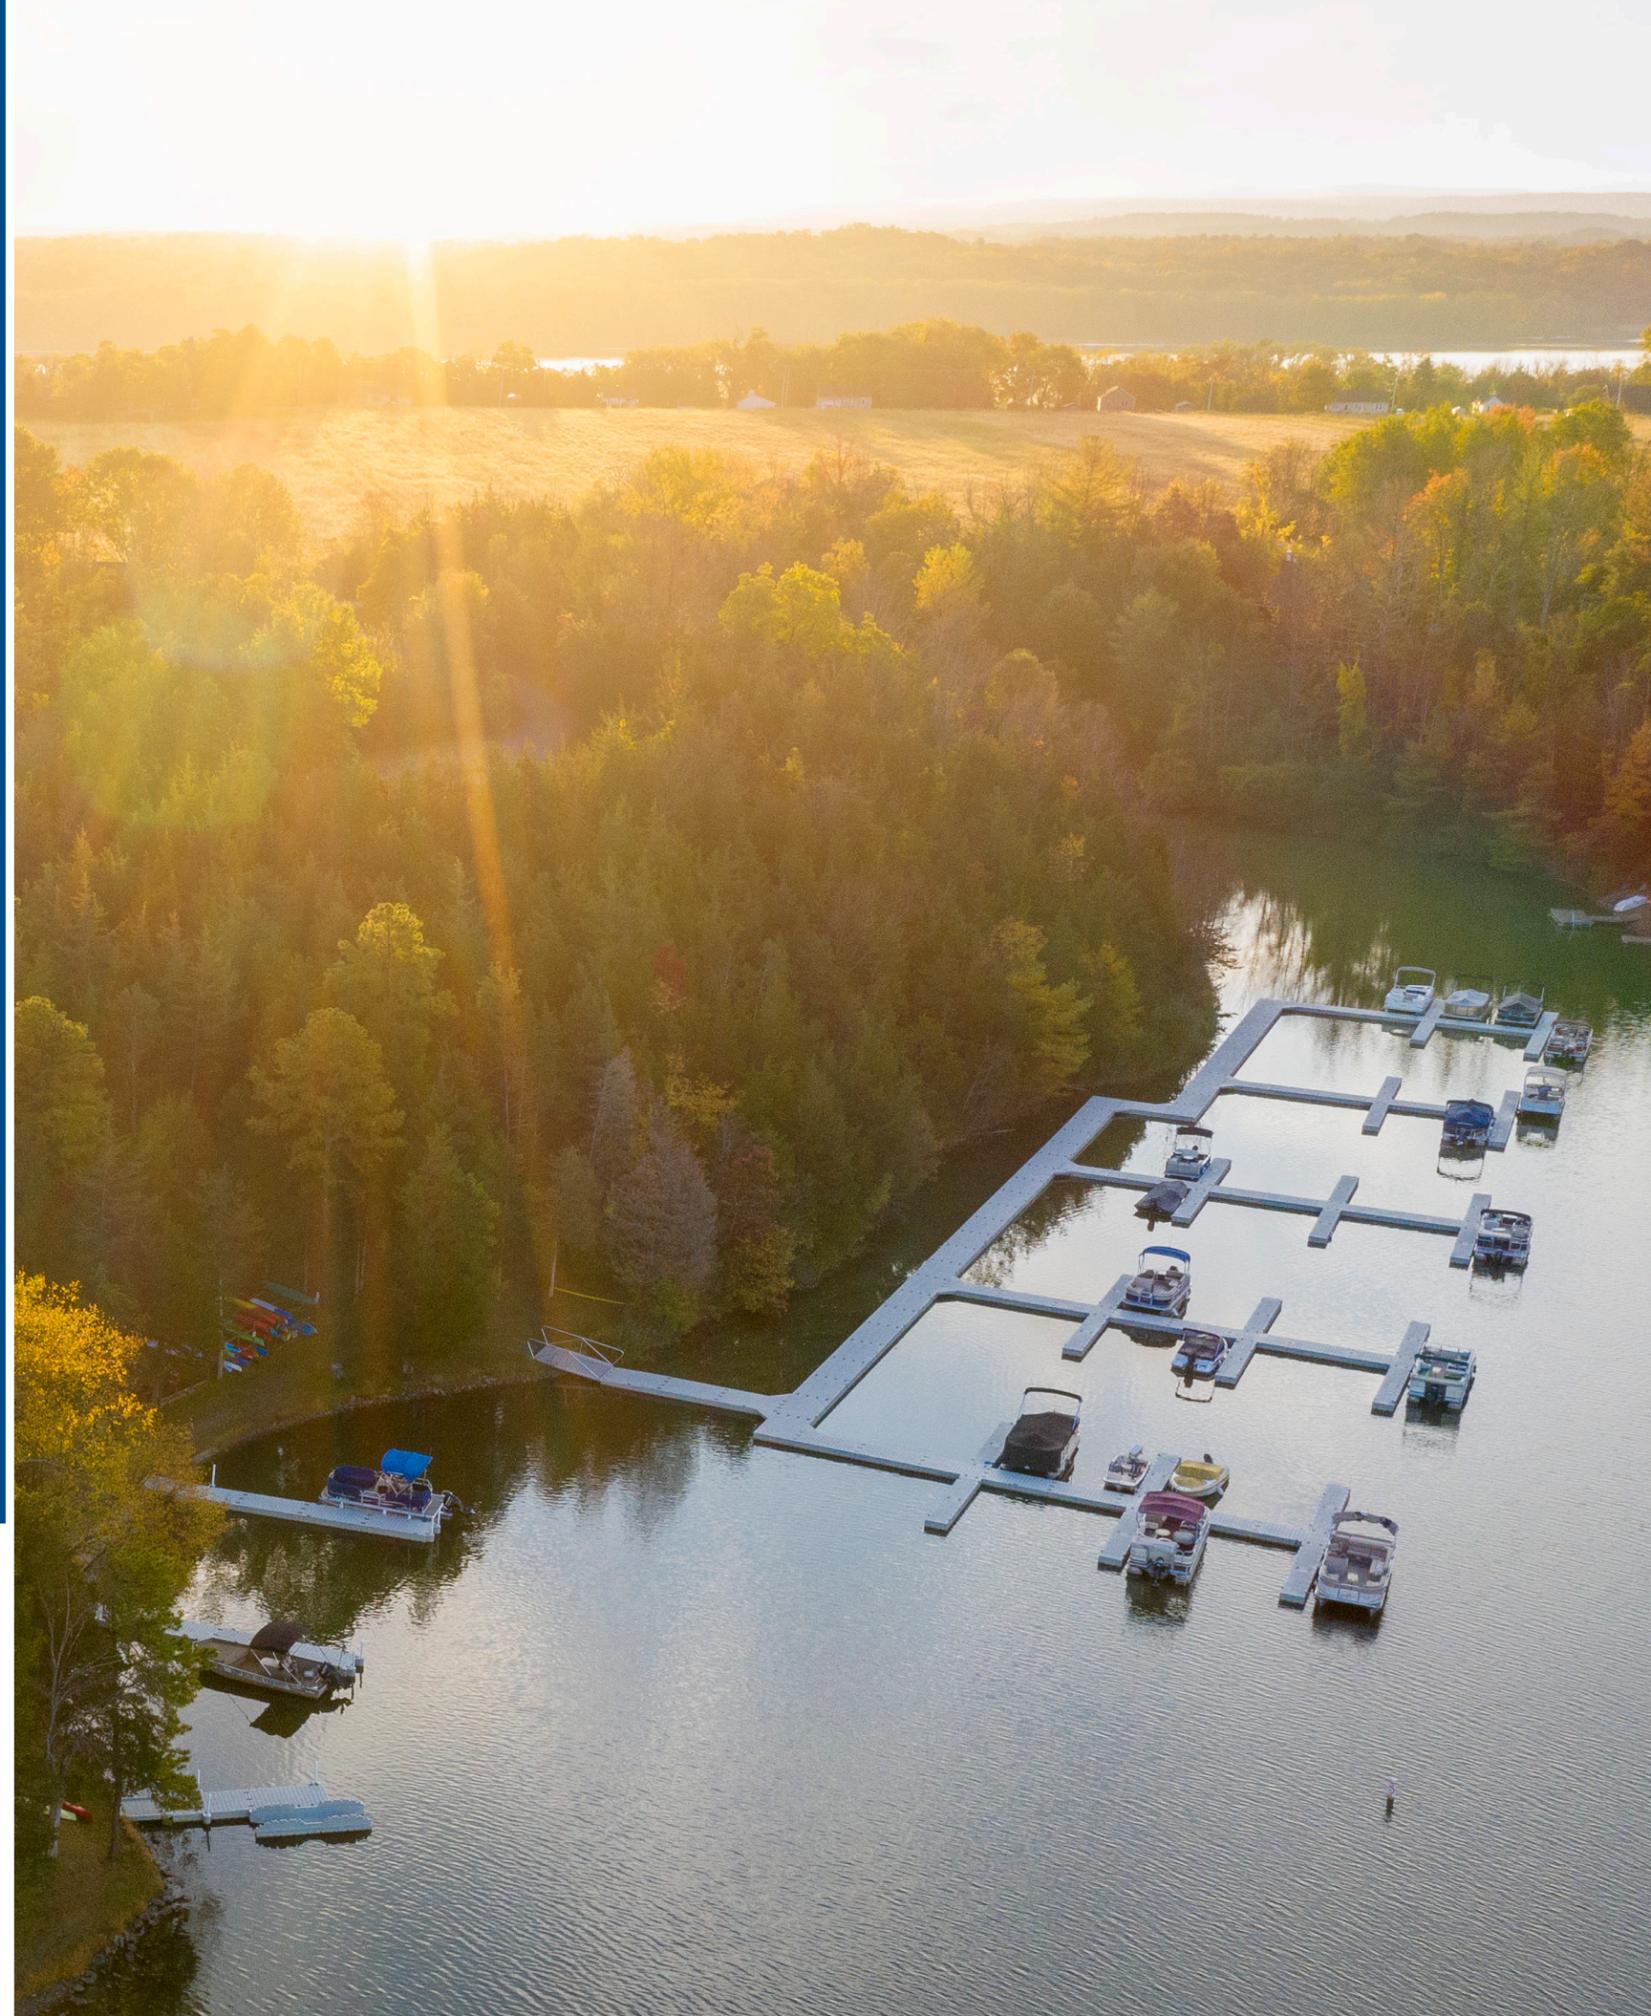

Innovative Coupling

- Made of recycled materials
- Nuts and bolts made of heavy duty, rust resistant composite
- Strength and durability even in the harshest weather conditions
